Solve Shared Device Management

podloc x PEAK TECHNOLOGIES

The Pain Points (Sound Familiar?)

1 Missing devices
Theft and misplacement reduce productivity.

2 Queue chaos
Queues form when staff collect and return devices.

We Have The Solution

Podloc securely **locks, charges, and tracks shared mobile devices.**
Modular hardware and smart software provide secure access, real-time visibility, and fast deployment.

Reduce Device Loss

On average, most organisations lose 15% of shared devices annually due to misplacement, theft, and poor tracking.

Podloc's virtual locker, Vlocr, software assigns devices to users with:
- secure logins
- time stamps
- location tracking

Device loss reduced to 1% or below.
*based on customer findings

End Queue Bottlenecks

Podloc enables fast take-and-go device access with individual login points, removing shift change queues.

Managers gain real-time visibility of:
- device availability
- charge status
- usage history

Result:
- faster shift handovers
- no searching for working devices

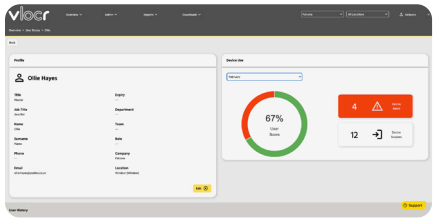
Podloc Options

podloc x PEAK TECHNOLOGIES

Option 1. Hardware and software

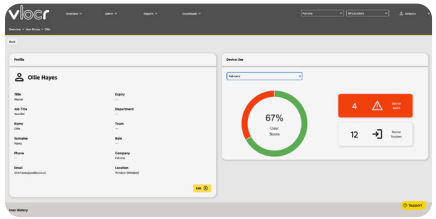
Podloc units are operated using our virtual locker software.
This provides the most comprehensive device management solution to **lock, charge, and track shared mobile devices.**

+



Option 2. Software-only

Certain devices like bricks-on-sticks do not fit in Podloc. Do not despair, you can still reap the **tracking** benefits of our software. Software is compatible with all Android devices.



Podloc Hardware: Charge Your Devices

podloc x PEAK TECHNOLOGIES

Features	Benefits
Fits most devices	Compatible with most PDA devices. Interchangeable liners let you switch devices without replacing the entire Podloc unit. You're no longer tied to one manufacturer
Charge devices	One device per pod with customisable profiles: set up charging limits/ smart charging
Lock devices	Provides the locking mechanism. Combined with our software, Podloc secures devices
Modular	Any place, any number of podloc units (1-1000s), easy relocation
Zero configuration	No Ethernet cable or Wi-Fi configuration. Set up power and you're good to go!
Simple installation	No qualified technicians needed or extensive manpower
Staff love using Podloc	Quick adoption, well-received
Rugged, one moving part	Durable, built to last 10+ years
Sustainable	Deliberately made from recyclable materials

Virtual Locker Software: Track Your Devices

vlocr x PEAK TECHNOLOGIES

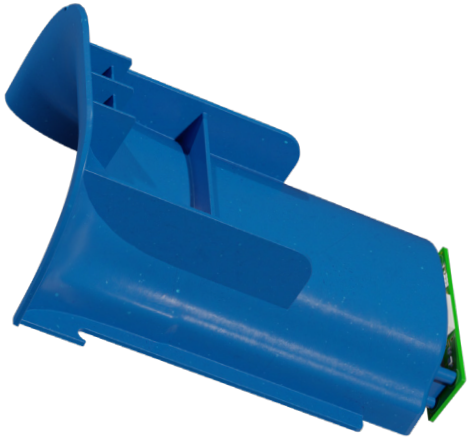
Features	Benefits
Track your mobile devices and accessories	Locate missing devices fast
Assign/ accountability	Managers know who had the device last and when
Report	Summarise information of device whereabouts in daily, weekly, or monthly reports
Alert	Immediate notice of missing devices by **text or email**
Compatibility	Android 7.1 and above, all MDMs, support OAuth and SSO
Online/ offline	Wi-Fi and power outages **do not** affect Vlocr!
Simple to use	Clients see this as the most powerful and simplistic solution out there
Multi-shift compatible	Input data for different shifts and expected device return times
Geofencing	Keeps the user logged in and linked to the device until returned to home
Highly configurable	Multi-location? No problem. Changing shift patterns? No problem. Mixed estate of devices? No problem
Cloud-based	Access anywhere

Removable Liners

podloc x PEAK TECHNOLOGIES

Changing devices shouldn't mean replacing your entire charging solution.

Podloc's removable liners make it easy to adapt your charging infrastructure as your device fleet changes. Simply swap out the liner to fit the new devices while keeping your existing Podloc hardware in place.



Flexible Swap-In, Swap-Out

Compatible for different device fleets. Freedom from vendor lock-in and single-device ecosystems.

Quick and Easy Install

Change the liners in minutes. No specialist training required.

Future-Proofed Charging Solutions

A cost-effective approach to device upgrades, extending the lifecycle of hardware to last 10+ years.
