

SAP-Centric Supply Chain Device Controller

**PEAK's
Versatile
SAP®-Centric
Supply Chain
Device Controller.**

**Back in the Day,
It Would Have
Looked a Lot
Like This.**

From RFID readers to printers, applicators, PLCs, lights, sensors, scanners and more, the supply chain is comprised of devices of all shapes and sizes, all with unique languages, roles and rules. Tying them all together is going to be a challenge... unless you have the right tool for the job.

Better get your hands on PAC, the PEAK Automation Controller. PAC lets you connect all your supply chain devices seamlessly into the SAP ecosystem. Coupled with PEAK Technologies' extensive Supply Chain Management experience and SAP expertise, PAC leverages your SAP investment throughout the supply chain. (No investment in costly RFID middleware required.)

PAC was developed for and runs on the SAP NetWeaver® platform, delivering a 100% SAP-Centric solution. It is an SAP certified device controller for SAP Auto-ID Infrastructure (SAP AII) and is certified Powered by SAP NetWeaver.

What's more, PAC is scalable and extendible. Since PAC runs on the SAP

NetWeaver Web Application Server platform, it can be deployed centrally or locally, on the SAP AII server or on its own.

Of course, PEAK also offers complete turnkey Supply Chain Management solutions including SAP business process consulting, functional/configuration resources, hardware and media, integration, and ongoing support.

Get the tool to rule all your devices... PAC from PEAK. For your FREE white paper "The Handyman's Guide to Supply Chain Device/SAP Connectivity Tools" visit www.peaktech.com/pac, or call 888-676-8801.
