

LABEL APPLICATION SOLUTIONS FROM PEAK TECHNOLOGIES

TABLETOP LABEL APPLICATORS AT A GLANCE

Semi-Automatic Labeling Systems are available in several variations. The tabletop workstation shown is equipped with a 360 series tamp labeler and custom fixturing. The fixturing provided is designed for small products that require very tight tolerance label placement.

Semi-automatic labeling systems are designed with both ease of use and operator safety in mind. Most workstations are available with either dual opto-touch switches or foot pedals to cycle the label applicator. A major advantage of the CTM tabletop labelers is the incredible flexibility of the 360 Series Label Applicator. From slower semi-automatic label applications to the most demanding high speed, tight tolerance automated production lines, the 360 Series Label Applicator can provide an entry level solution at a very economical price that can be used for more demanding applications in the future as your business grows!

Most Semi-Automatic work stations are also available with the 3600-PA Series Printer Applicator.

PRODUCT ENHANCEMENTS THAT SUIT SPECIFIC APPLICATIONS

As noted above, tabletop label applicators come in all shapes and sizes. Below are some of the factors that may contribute to an efficient and appropriate labeling process for your specific labeling requirement.

- ❖ Print on-demand with a Tabletop **Printer Applicator**
- ❖ Touch screen
- ❖ Clear label sensing for film labels
- ❖ Applicator cycling methods: Dual opto-touch switches or convenient foot pedals
- ❖ Available 6" color, touch screen operator interface on the model 360a
- ❖ Low label or web (label liner) break identification and warning
- ❖ Stack lights variations for visual applicator status indication
- ❖ Resilient or delrin tamp pads to accommodate delicate or sturdy products for labeling
- ❖ 16 or 20-Inch outside diameter label rolls capability for maximum productivity
- ❖ Tamp stroke lengths to accommodate a vast size variety of products to be labeled

There are many additional considerations that may not be listed. Please contact PEAK to guarantee maximum return on your labeling solution purchase!
