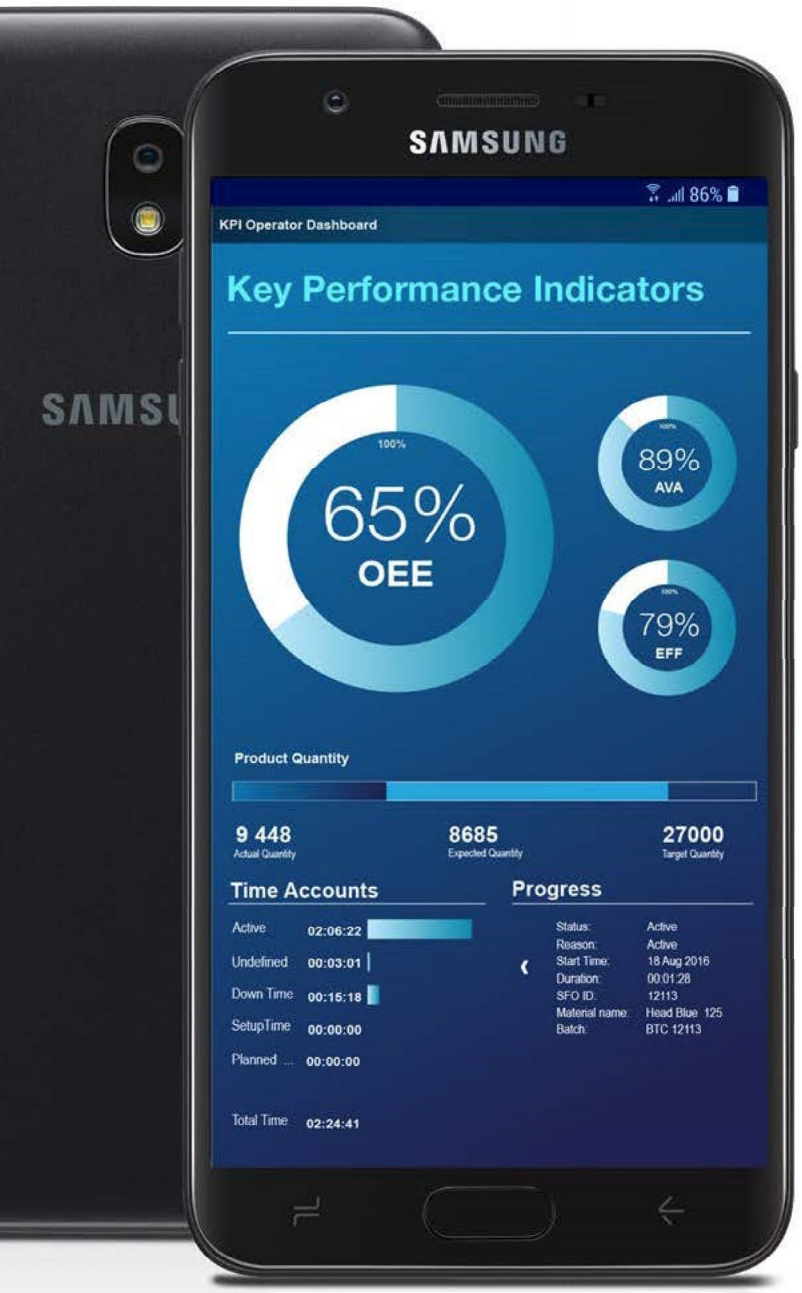
SAMSUNG

Unlocked by Samsung

Galaxy J7

Unlock greater potential and productivity.



Unlock true mobility and empower productivity through untethered freedom, security and an optimal user experience.

Work without barriers and discover more opportunities with the Samsung Galaxy J7. Designed to give you the flexibility you need to make the best decisions for your business, Unlocked by Samsung smartphones allow you to choose the carrier that works best for you. The 5.5" HD display facilitates multitasking, while an Octa-Core processor, expanded storage options and long battery life enable work without interruption. And Samsung Knox™ technology offers enterprise-grade security for all your mobile business data.

Unlock Freedom

Carrier or no carrier. It's your choice. With Unlocked by Samsung smartphones, you have the freedom to choose what works best for your employees.[1] You can also standardize on one device across multiple carriers, greatly simplifying IT. And no-contract Unlocked by Samsung smartphones can be customized for a company's Wi-Fi only environment where no phone service is necessary, combining the functionality of a tablet with the portability of a hand-held device.

Unlock the Mobile Device Experience

Unlocked by Samsung smartphones don't come pre-loaded with any carrier apps, so you have a consistent user interface (UI), and you can customize device software exactly the way you need it. And Unlocked by Samsung smartphones are optimized for U.S. carrier networks,[1] with access to exclusive Samsung services like Knox and Samsung+ personal support.[2] Nothing will hold you back.

Unlock Value

When everyone has the same UI, you have lower training and support costs. You have the right contract with the carrier of your choice, or even have no carrier at all. Software updates are easily managed, and you can configure devices in bulk. And your unlocked devices are CapEx assets. With Unlocked by Samsung smartphones, you save from start to finish.

Unlock Defense-Grade Security

The Samsung Knox security platform is embedded within the hardware to ensure security from the chip up, offering superior protection and easy manageability. Knox keeps hackers out and your data safe from the moment you turn it on.[3]

Premium Design in an Affordable Package

The large, bright, 5.5" HD in-cell TFT display provides excellent viewing quality. And improved front and rear cameras with more megapixels and greater image resolution help workers capture high-quality worksite images, company assets and more.

Long-Lasting Battery and Expandable Memory

The 3300 mAh battery is long-lasting, giving personnel in the field power when they need it.[4] 32 GB[5] of internal memory provides plenty of space for files, videos and photos, and if more data storage is needed, up to 400 GB of additional space can be added with a microSD card.[6]

Seamless Integration and Management

The Galaxy J7 is compatible with some of the most popular MDM, SSO and VPN solutions, making it easy to deploy and integrate without changing existing infrastructure. Bulk enrollment can activate large fleets of devices, while robust IT policies and APIs enable maximum control.
